## LAKE DELAVAN BEDROOM

This room has a beautiful view of Lake Delavan and the owners didn't want to lose any of it behind drapery. Consequently, the valance needed to be short but very wide. I had a wide band of fabric sheered between burgundy cording to give it "presence" and weight. Also, because this is a second story room, "top down" window shades could be used for privacy and the view maintained.

This is a year round bedroom so I wanted warm colors in the fabric and walls. The burgundy and tobacco in the Gaston and Daniela fabric enhances the patina of the French provincial armoires and other antiques in the room.
